

Sandy Beach

Sensory Bottle

You will need:

Clear, empty bottle (with an opening large enough for small seashells to fit in)

Fine sand (enough to fit your chosen bottle)

Water

Small seashells

Gold fine glitter

Funnel

Strong glue

Sticky tape (optional)

Method

1. Use the funnel to pour sand into the bottle. Fill the bottle half-full with the sand.
2. Add the small seashells to the bottle.
3. In a separate container, add the glitter to the water and stir.
4. Use the funnel to slowly fill the bottle to the top and secure the lid onto the bottle. Allow time for the glue to dry. You may also like to tape around the lid bottle.
