

Feed a Frog

Sensory Bag

You will need:

Clear ziplock bag

Duct tape

Sticky tape

Clear hair gel

Scissors

Small fly toys or Fly Cut-Outs and laminator

Frog Image

Method

1. Squeeze some hair gel into the bag (not too much because then you won't be able to squish the ornaments around).
2. Add the flies.
3. Once all the materials are in the bag, close it up and tape the top so the gel and ornaments don't seep out.
4. Cut out the Frog Image and cut out the hole for its mouth. Stick the frog to the front of the bag using sticky tape.
5. Then the fun begins! Can the children get the flies into the frog's mouth?
